

The inward opening slide-fold “Aru patio FOLD 68 SOFTLINE IN” terrace door is the perfect solution when a large unobstructed opening is required. The same profiles are used as the tilt turn window so this is an ideal matching solution. This can fit openings of up to a maximum width of 6 meters. Constructed from Pine, Oak or Meranti.

Aluminium cover strips finish the bottom jamb and the bottom sash. The colour selection for this covering is white RAL9016; aluminium and anodized brown.

Aru patio FOLD 68 SOFTLINE IN
